

Salt and Fire: Cleansing and House Purification Rituals (An Instructional Story) (The Priestess Diaries)

Stand-alone teaching story using characters from the series. This is an instructional story about how to use cleansing and house purification rituals. In it, Lauren conducts a thorough house cleansing to get rid of unwanted energies and entities, and she explains what to watch out for and how to take SAFETY precautions. Please read this story through the end to understand the potential dangers of certain cleansing chemicals. Series purpose: The Priestess Diaries are a novelized combination of true-life events taken from personal journals, articles, and interviews with High Priestesses, a High Priest, and spiritual leaders. Each book in the series emphasizes particular spiritual lessons and provides a context for their implementation. The series also uses the backdrop of a developing love story and its ups and downs because it is within the framework of relationships with others that we learn our greatest lessons and are given both the reason and the need to learn who we are in order to love unconditionally. The journeys presented in this series of books are often based on the information available at the time of the story and the characters perception of that information at that time. As more information becomes known to the characters, some of this information will be proven wrong in future stories, but it is important to present the characters perception of truth at each phase of their development because understanding is critical to spiritual growth. Some of these flawed perceptions will be evident to the reader and observer long before they are evident to the character in the journey. Such is life. Characters described in the series are composites of many personalities in the pagan community and any familiarity with these characters represents the universality of the human, pagan, and spiritual experiences both very good and very bad. The characters are not always presented in positive terms, but then, these

books aren't meant to be fluffy. The characters, like real people, are flawed, fallible, and capable of redemption.
