The Tuned In Musician

Why Another Book on Meditation for Musicians? Because the last thing that musicians need is to thirst for something only to come up dry! There have been many excellent books written for musicians that deal fairly extensively with the issues, challenges, and concerns of what has been called the inner-musician. Specifically, texts such as The Inner Game of Music, The Mastery of Music, and Effortless Mastery, just to name a few. These books are written by some of the worlds finest musicians and offer some excellent advice to the musician. This book however seeks to dig deeper, or perhaps further back would be a better description. This book seeks to take the musician (and really anyone who wants to better be in tune with the Creator in their creative work) back to creation, and to the Creator, seeking to answer the question: How can we be better tuned into the Creator and the commission of creating, as well as the community which we seek to make music for? Tuned In is based on a historical meditation model and is really aimed at both encouraging musicians and derailing fears as well as re-thinking the ethical, spiritual, and moral implications of what it means to be a musician. Tuned In is written by a musician and primarily meant to challenge and encourage musicians in the discipline of meditation (especially in practicing, writing, and playing music), but this book is really for any artist- especially those involved in the communicative arts. Are you a communicative artist, do you communicate through vour voice, instrument, writing, painting, or sculpting? Perhaps even through the culinary arts? Tuned In is a book for you. Tuned In is an alternative to the New Age contemplative spirituality and mysticism offered in many mainstream books on meditation for the musician. The book will offer a historical biblical meditation that is broken down simply into considering how the musician

can best serve and love Creator and community through music and life, all the while enjoying more fruitful creativity by tuning into their unique and God designed purpose. Tuned In explores meditation as a means to far more than just better music (but it does that too). Readers will engage important concerns such as how to handle grief, anger, and injustice as a musician. It provides a meditative approach to practice, composition, and making music that focuses on what is true.
